

Claire's Day School adjusts tuition every two years to reflect staff cost of living raises.

The next increase will be with the Summer 2024 term and 2024-2025 school year; however, those tuition rates have not yet been determined. Past average biyearly increases have historically risen ~10-12% from the [current year's tuition](#), though the next adjustment will likely necessitate a higher percentage to combat the extreme rise of inflation in recent years.

This document will be updated by the time enrollment for these terms begins in late January 2024 to reflect the actual tuition rates. Parents will always be made aware of tuition rates prior to enrolling.

Once solidified, tuition rates will never change mid-year. In other words, tuition from September through May will remain the same per the publication of the [current's year's tuition](#).
